

BRACA Testing at Women's Care of Beverly Hills

This simple blood test helps women who have a family history of breast or ovarian cancer to identify their risk of developing these cancers.

Women with the gene tend to develop this disease earlier than the general population. Most women, even with significant family history, do not have the gene.

You can schedule an appointment with our Nurse Practitioner for counseling and testing by calling our office at 310 657-1600 and asking for an appointment for BRACA testing.

Our staff is available for scheduling Monday – Friday 9 AM – 5 PM.
