

Congratulations and welcome to **Women's Care Of Beverly Hills Medical Group!** We are happy you have entrusted us with your care and are privileged to be a part of this journey. We ask that you read our care packet that will help you prepare for the changes that accompany pregnancy.

The WCBH Pregnancy Care Packet includes:

- Frequently Asked Questions in Pregnancy
- Common Symptoms During Pregnancy
- Safe Medications During Pregnancy

More trusted information is available at: www.acog.org/For_Patients

Our doctors have full staff privileges at Cedars-Sinai Medical Center. Labor and Delivery is located on the 3rd floor, North Tower of Cedars. The medical center asks that you register your pregnancy with them around the 20th week of your pregnancy. The checkout desk at WCBH will provide you with the registration packet that also includes information for Labor and Delivery tours and childbirth, infant CPR, and breastfeeding classes.

When you do go in to labor or experience rupture of membranes after 36 weeks you do not need to call the office—the hospital will notify your physician as soon as you are evaluated. If you experience a medical or obstetric emergency during your pregnancy, call the office at 310-657-1600.

We wish you the very best experience we can provide throughout your pregnancy and delivery! Please do not hesitate to share with us how we can make this experience even better.

Ruth F. Cousineau, M.D. Robert F. Katz, M.D. Jay M. Goldberg, M.D.

Suzanne Gilberg-Lenz, M.D. David L. Finke, M.D.
